HIGH TEMPERATURE MASKING TAPE

Application

- Professional indoor application, where temperatures do not exceed 80°C for 30 minutes
- Used when painting to provide perfect, sharp edges and clean lines
- Surfaces must be dry and dust-free, prior to application

Features & Benefits

- Used for both general purpose or high temperature masking applications
- Easily removable without leaving residue behind
- Excellent adhesive properties, with high tolerance to paint bleed-through (indoors or outdoors)

NOTE

- Masking Tape contains a pressure-sensitive adhesive and should be rubbed down to ensure proper adhesion onto the substrate below
- If left on certain surfaces for extended periods, the tape's adhesive can transfer onto the surface and will become difficult to remove
- Store tape in a cool, dry and dark place

MERCHANDISING SOLUTIONS

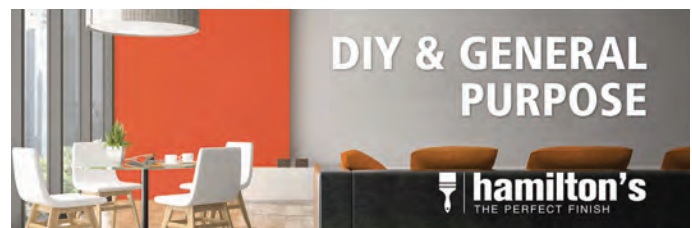

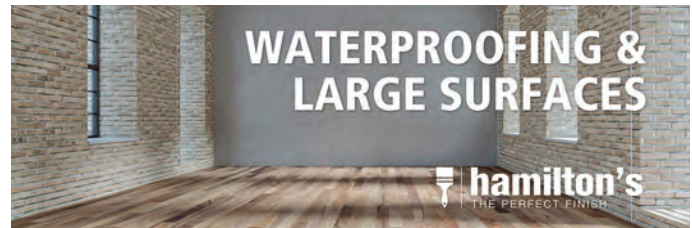

CATEGORY MERCHANDISING

Category Merchandising is an innovative merchandising concept from Hamilton's Brushware that groups products by their application and use rather than by product range or product type.

Buyers come into a store with a problem/need that must be solved and Category Merchandising is a visual cue that assists them in quickly and easily finding the products that are best suited to solving their problem/application.

Speak to your Hamilton's representative to explore implementing Category Merchandising in your store.
